# INTEGRACAD2011

## OFFICIAL PRICELIST

Valid from January 21st 2011.

### General sales terms:

- The program is sold with a time-limited usage licence. After expiration of the purchased usage period (30, 90 or 365 days) the program will stop working.
- The program works with a USB licence stick exclusively. The USB licence stick must be acquired with the purchase of the first time limit. The USB licence stick cannot be purchased separately of the usage time limit. The USB stick is not the licence but the licence carrier.
- The right to a price discount can be acquired only while the old usage licence is active (for version 2009 the maintenance period is applied).
- The purchase of a 365 days licence entitles the buyer to a free online group training session. Dates and programmes are available online at [www.integracad.com](http://www.integracad.com). The buyer must apply for the online training by himself/herself.
- The prices quoted in this pricelist are only valid if the purchase is made by invoice or proforma invoice from Impuls ing d.o.o., Croatia. The prices for Croatia are recalculated to Croatian Kuna and the legal VAT is added.
- By buying in our online shop, the software and services are purchased from our partner Digital River GmbH from Germany while delivery is still carried out by Impuls ing d.o.o. The purchase receipt is generated by Digital River GmbH and can be printed out directly after the sale is concluded. According to article 4, in connection with article 6 concerning tax-free export in the German Law on trade tax (UStG) buyers outside of Germany do not have to pay VAT.
- The prices of our software and services sold by our distributors can differ from the standard pricelist. A list of official distributors can be found on our website <http://www.integracad.com/Home/Howtobuy.aspx>
- Special discounts, upgrades and other benefits which used to be valid are no longer valid.
